*\* To help you define a Territory refer to this paragraph: Ideally, a Territory would be a whole country. Nevertheless, in countries where the geographical specificity implies, many Territories might coexist. For instance, in countries divided in big states or in big cities, where the market coverage would be considered difficult for all these Territories or cities by one Franchisee, different Franchisees might coexist per Territory or per city in the same country, some even in the same city.*

*In all cases you will have an Exclusive Territory defined by: 1) a total population of a minimum of 2 000 000 and or 2) a geographic area extending inside a radius of 100 km from your location. The decision to have one or the 2 of the conditions satisfied will be at our own discretion nevertheless putting the best business practice and intentions in act.*

**Reserved for the NFU – Marketing Department**

The below decision reflects the NFU willingness to continue throughout the next stages based on the proposition sent. The decision will be based on many factors such as Territory (already having an operating NFU in or near-by the Territory, the demographics and the eligibility of the applicant). This letter should be sent back to the applicant after filling the NFU reserved section within 15 days of submitting it.

A positive reply means that the NSA has been considered as a potential candidate by the NFU but does not necessarily engage the NFU in any further proceeding nor sets a timeline for the continuity of the process
